- Sikaflex®-290 DC Pro Caulking Sealant

BUILDING TRUST

SIKA TEAK DECKING SYSTEM

HIGH PERFORMANCE, TRUSTED LONG LASTING DECKING SYSTEM, WITH FLEXIBILITY TO HANDLE ALL VESSEL AND WOODEN MOVEMENTS UNDER EXTREME MARINE CONDITIONS

Sikaflex®-298 is a slightly thixotropic 1-component polyurethane adhesive which cures on exposure to atmospheric humidity. It is used for teak deck bedding.

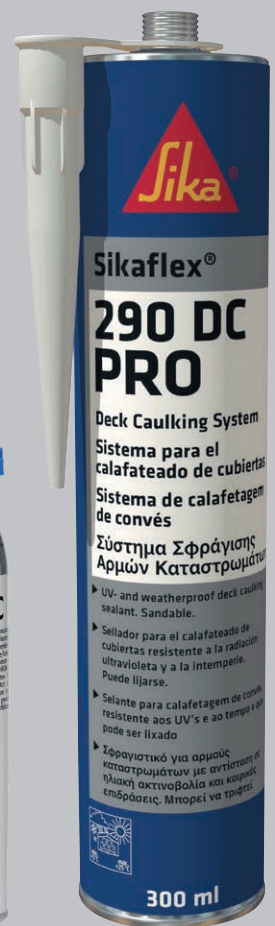

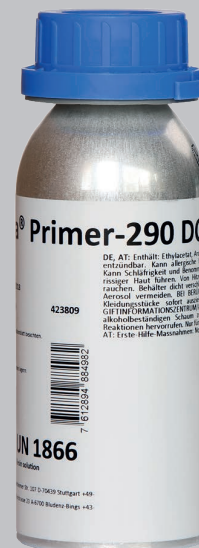

Sikaflex®-290 DC PRO is a 1-component polyurethane based joint sealing compound, specifically formulated for caulking joints in traditional timber marine decking.

Sika® Primer-290 DC is a solvent-based colourless to slightly yellow primer, which reacts with moisture and forms a thin layer. This layer acts as a link between substrates and adhesive/sealant.

Sika® Primer-290 is specifically formulated for the treatment of timber decking strips prior to caulking with Sikaflex®-290 DC PRO or bonding with Sikaflex®-298.

FEATURES AND BENEFITS

- Interior and exterior luxury finish
- Sound deadening properties
- Robust and durable
- Highly elastic
- Moisture curing
- IMO approved
- Resistant to ageing and weathering
- Suitable for manual and pump application
- Excellent cleaning performance with Sika Teak C+B
