

SIKA AT WORK

SIKAFLOOR® MARINE-595 ENTERS THE MAJOR LEAGUE

THE NEW SIKAFLOOR® MARINE DECOTEAK INNOVATION WITH SPECIAL PATENTED COOL TECHNOLOGY INSTALLED AT THE TENDERSTORE OF MY O'PARI.

BUILDING TRUST

ONE OF THE MOST LUXURY MEGA YACHTS IN EUROPE

PROJECT DESCRIPTION

Built by the Greek shipyard Golden Yachts, the 95 meters Mega Yacht O'PARI is one of the most luxury mega yachts offered for yacht charter nowadays in Europe. Studio Vafialis is the designing company for the interior and exterior of this beautiful white pearl.

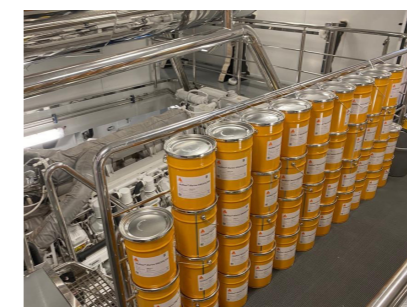

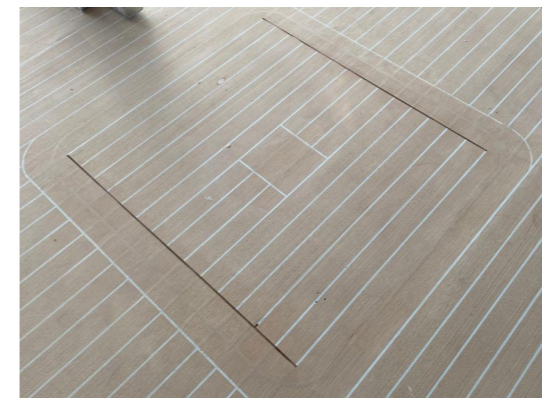

With a 29 headed crew and the ability to carry additionally 12 guest, this floating palace can travel at a cruising speed of 16 knots per hour. The 14 meter wide yacht is equipped with two Caterpillar diesel engines, producing an astonishing 6.772 horsepower to propel the yacht.

She provides limitless luxury with facilities as a helipad, jacuzzi, exterior pool, Gym amongst other things. Consequently, if you are planning some holidays or special event with friends, you can charter her for just 1 Million Euro/week, taxes excluded.

Sika Marine is always involved in most important Mega yachts building globally since years, what makes this project special is the application of the new Sikafloor® Marine-595. Just before the O'Pari started sailing the world's oceans, the tenderstore was finally outfitted with Sikafloor® Marine-595.

The Sikafloor® Marine-595 is a new development, consisting on an abrasive resistant but light weight 2K PU decorative resin with cool touch and feel. This technology is unique in the market and provides limitless comfort to passengers and crew with a cool feeling when exposed to heat.

The new resin has been developed by Sika Corporate Marine and Sika Netherlands R&D department. The 18 months period development brings best color palate in the market with 16 tested wood-tone colors.

DEVELOPED BY SIKA CORPORATE MARINE & SIKA NETHERLANDS R&D DEPARTMENT

After placing new hedges and installing new lashing points for the 4 jetski's and 3 tender boats, the experienced Dutch Sikafloor® Marine contractor Global Marine Decking Projects initiated the installation process. The works started by levelling the deck with Sikafloor® Marine-530 Grey SL, and after curing the deck was ready to receive the state-of-the-art Sikafloor® Marine-595 in 7 mm thickness on a total area of 125 m2. After cutting and filling the light grey caulking lines with Sikafloor® Marine-590 the deck received its final grinding treatment and cleaning, giving it almost a real teak looking sensation.

The new interior area looks great and comfortable as targeted, and has been really appreciate by Golden Yachts.
